

Wondem Abebaw

Senior Full-Stack Developer | Applied AI Engineer

Addis Ababa, Ethiopia | +251 94 826 1915 | wondem5060@gmail.com | [LinkedIn Profile](#)

SUMMARY

Full-stack software engineer with 3+ years of production experience across backend, frontend, and cloud-native systems. Delivered software for banking (2M+ users, 500B+ ETB in transactions), transport, ride-hailing, education, healthcare, and job-matching platforms across Ethiopia and the US.

Experienced in microservices architecture, event-driven systems (Kafka/RabbitMQ), and containerized deployments, with a growing specialization in multi-agent AI systems and RAG architectures.

Comfortable mentoring junior engineers and contributing to code reviews and architectural decisions within cross-functional teams.

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python, Java

Frontend: React, Next.js, Tailwind CSS, GraphQL (Apollo), State Management Tools (Redux Toolkit, Hookstate, TanStack Query, Zustand, React Query, Context API), Form Management Tools.

Mobile: React Native,

Backend & Frameworks: Node.js, Golang, NestJS, FastAPI

Databases: PostgreSQL, MySQL, MongoDB

API Design: REST, GraphQL, gRPC

Event-Driven & Messaging: Kafka, RabbitMQ, SSE Streaming

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines (Jenkins, GitLab CI), Monorepos (Turborepo), n8n

AI Engineering: LangGraph, LangChain, LangSmith, LCEL, RAG, Multi-Agent Systems, Prompt Engineering, Vertex AI

Vector DBs: ChromaDB, FAISS, Pinecone, Weaviate

EXPERIENCE

Senior Software Engineer — EagleLion System Technology *Aug 2025 – Present*

Addis Ababa, Ethiopia

- Developing applications for banks such as Dashen Bank S.C. and microfinance institutions such as Choice Microfinance.
- Contributing to architecture and service design decisions, and reviewing code from teammates to maintain quality and consistency across services.

Full-Stack Developer — Vintage Technologies PLC *Aug 2023 – Aug 2025*

Addis Ababa, Ethiopia

- Led the architectural design for high-security admin portals and APIs for platforms including a U.S.-based transport system (LINQ Solutions), a ride-hailing service (Cheetah), a tutoring app (Tuteapp), and a job-matching platform (Emebet).
- Developed scalable, modular React components with Next.js while contributing to backend features using Node.js, Express, NestJS, and PostgreSQL.
- Designed and implemented RESTful APIs, optimized database queries and indexing strategies, and managed authentication and authorization flows.
- Mentored junior developers on the team and participated in code reviews to reinforce engineering best practices.
- Worked cross-functionally on system architecture, deployment pipelines, and API integrations to deliver seamless user experiences.

Web App Developer — Swift Technologies PLC *June 2025 – Jan 2026*

Addis Ababa, Ethiopia

- Developed a complete web application for an educational platform.

Front End Developer — ArifGet – Online Course & Job Matching Platform *Jan 2025 – Aug 2025*

- Developed a high-performance admin dashboard using React for a platform bridging job seekers and educational content.
- Optimized frontend performance and improved component reusability.
- Participated in UI/UX planning and feature rollout strategy with cross-functional teams.

Junior Software Developer — AIT Technology PLC *May 2023 – Aug 2023*

Addis Ababa, Ethiopia

- Helped modernize a hospital medical record system by refactoring legacy code and integrating a modern JavaScript framework.

NOTABLE PROJECTS

Dashen Bank Super App Central Portal

- Developed a high-security admin panel to manage the bank's super app, which passed 2M+ active users and 500 billion ETB in transactions, adding new features and fixing existing bugs while improving database query performance.

Dashen Bank Paperless Banking (Ongoing)

- Developing the web versions of paperless banking — client web app plus branch and central portals — aimed at automating in-branch workflows and reducing physical paperwork.

LINQ Transport – School Bus Management System

- Developed key components for a U.S.-based school bus management platform, including admin dashboards and robust API integrations.

Kabba Transport Platform – Carpooling Service

- Built a carpooling platform to efficiently connect riders and drivers.

Emebet – Job Matching Platform for Women

- Contributed to a platform dedicated to connecting women job seekers with employment opportunities.

Tuteapp – Tutors & Parents Matching Platform

- Developed features for a platform connecting tutors with parents seeking educational services.

ArifGet – Online Course & Job Matching Platform

- Developed a high-performance admin dashboard for a platform bridging job seekers and educational content providers.

AIT – Hospital Management System

- Modernized a legacy hospital medical record system by refactoring code and integrating modern JavaScript frameworks.

EDUCATION

Full Stack Web Development — Evangadi Tech School *June 2023*

Bachelor's Degree— Addis Ababa University *July 2022*
